FOOD SERVICE EQUIPMENT

Quick is a modular shelving system conceived for being light and strong thanks to its aluminium frame and plastic pierced shelves. Each shelf loads up to 150 kg. Quick has been conceived for being used in areas with temperature range between -38°C and 30°C. Quick can multiply itself by fitting spaces also with open shelves corner modules: this combination allows free access at the whole storage surface.

Assembly instructions

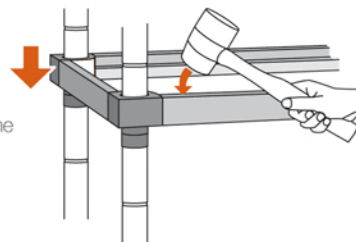

1

Open the plastic bushings and fit them to the poles at the desired height.

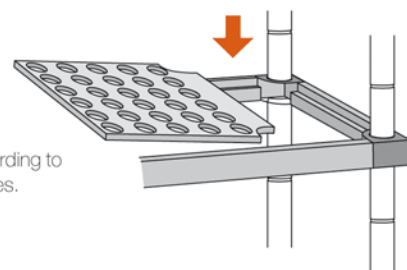

2

Insert the aluminium shelf frame also by using a rubber hammer.

3

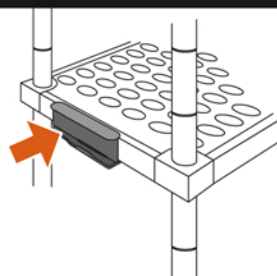

Insert the plastic pans according to the aluminium frame grooves.

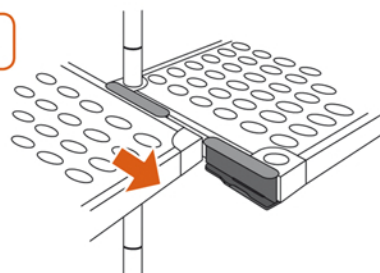

CORNER COMPOSITION:

To compose the corner module without pole, insert the plastic junctions, 2 for each shelf, on the opposite sides of the frame. Recessed area will help for correct placing. Second shelf will be connected by sliding inside junctions. Also use a rubber hammer to facilitate shelf frame sliding.
